

MYTHOS-CMP-SCORE-0001

Comparative Evaluation Scorecard Compendium

Historical baselines, evidence confidence, and current proof status across CMP-001 through CMP-008.

HISTORICAL BASELINE / CURRENT EVIDENCE POSTURE

Baseline scorecards are lineage, not current winners

This compendium preserves July raw and evidence-adjusted baselines while explicitly withholding September numeric reranking until controlled proof is reproduced.

CMP-001	NetBox and Nautobot	NetBox 50.7 / Nautobot 50.0	2026-07-24 BASELINE
CMP-002	Enterprise NGFW Platforms	Palo Alto 51.2 / Check Poin 50.6 / Fortinet 49.9 / Cisco Secu 47.5	2026-07-24 BASELINE
CMP-003	Enterprise SIEM Platforms	Microsoft 50.6 / Splunk Ent 50.5 / Google Sec 49.2 / Elastic Se 49.6	2026-07-24 BASELINE
CMP-004	Agentic Frameworks	LangGraph 51.5 / Amazon Bed 49.8 / Itential A 49.2	2026-07-24 BASELINE
CMP-005	Modern Private Networking	Tailscale 50.1 / NetBird 49.4 / Cloudflare 49.0 / ZeroTier 48.0	2026-07-24 BASELINE
CMP-006	Campus Networking Platforms	Cisco Cata 49.9 / HPE Aruba 49.6 / Juniper Mi 48.8 / Fortinet C 48.1	2026-07-24 BASELINE
CMP-007	IaC and Control Planes	Terraform 51.3 / OpenTofu 50.8 / Pulumi 50.8 / Crossplane 49.7	2026-07-24 BASELINE
CMP-008	Configuration Management	Red Hat An 51.8 / Puppet Ent 49.2 / Chef Infra 47.9 / Salt 48.9	2026-07-24 BASELINE

CONFIDENCE MODIFIERS AND PROOF THRESHOLD

Evidence confidence remains independent of capability

All current product refreshes in this release are bounded at E2 until the controlled laboratory plan is executed. That is why the release does not manufacture a new overall winner.
