

MYTHOS-CMP-EXEC-0001

Comparative Evaluations Executive Portfolio

Executive governance, current revalidation posture, and decision discipline for CMP-001 through CMP-008.

Eight evaluations, one evidence-bounded decision system

GATES FIRST

A failed non-compensable gate cannot be averaged away.

PROFILE FIT

Operating model changes the relevance of capability.

EVIDENCE

E2 documentation is not E3 laboratory proof.

LIFECYCLE

Migration, rollback, upgrade and exit are selection criteria.

NO UNIVERSAL WINNERS

A single overall ranking is withheld when profile fit differs.

REVALIDATE

Fast-moving products trigger review on release and architecture change.

CMP-001	NetBox and Nautobot 2 candidates / 18 criteria / current max evidence E2 / lab rerun pending
CMP-002	Enterprise NGFW Platforms 4 candidates / 18 criteria / current max evidence E2 / lab rerun pending
CMP-003	Enterprise SIEM Platforms 4 candidates / 18 criteria / current max evidence E2 / lab rerun pending
CMP-004	Agentic Frameworks 3 candidates / 18 criteria / current max evidence E2 / lab rerun pending
CMP-005	Modern Private Networking 4 candidates / 18 criteria / current max evidence E2 / lab rerun pending
CMP-006	Campus Networking Platforms 4 candidates / 18 criteria / current max evidence E2 / lab rerun pending
CMP-007	IaC and Control Planes 4 candidates / 18 criteria / current max evidence E2 / lab rerun pending
CMP-008	Configuration Management 4 candidates / 18 criteria / current max evidence E2 / lab rerun pending

PORTFOLIO REVALIDATION STATUS
