

Emerging Technology Research and Transition Guide

Architecture & Assurance Map

A compact reasoning model for implementation, assessment, and evidence review.

OPERATING POSITION

Technology evidence becomes authority only after readiness gates.

EVIDENCE PATH

signal -> lab evidence -> pilot evidence -> transition decision -> lifecycle review

READINESS SIGNALS

maturity, interoperability, safety, reversibility, supplier exit

PERMANENT PUBLICATION IDENTITY

Emerging Technology Research and Transition Guide			DOCUMENT ID MYTHOS-GUIDE-EMT-0001 VERSION 1.0.0-candidate STATUS Candidate Engineering Guide PUBLISHER Mythos Systems PUBLICATION DATE 2026-07-24 SCHEDULED REVIEW 2027-01-24 CLASSIFICATION Public
0 ATOMIC CRITERIA	6 ASSURANCE VIEWS	4 IMPLEMENTATION PROFILES	1 PERMANENT IDENTITY

Publication doctrine. This publication establishes durable requirements for its defined scope. Interpretation must preserve the permanent document identity, required evidence, controlled exceptions, source currency, and formal revision history.

EMERGING TECHNOLOGY AND ASSURANCE TOPOLOGY

Emerging and Advanced Technology

A trustworthy emerging technology research and transition guide program is a governed path from research claim through baseline, experiment, safety and security challenge, transition decision, bounded operation, and preserved evidence.

CLASSIFY

Separate established practice, candidate standard, reproduced result, vendor claim, implementation hypothesis, and open research.

EXPERIMENT

Declare baseline, configuration, uncertainty, scenario coverage, stop conditions, and independent reproduction before conclusions.

CONSTRAIN

Identity, policy, safety envelopes, physical boundaries, cryptographic authority, and human intervention limit consequence.

TRANSITION

Adoption, pilot, production, rollback, supplier exit, lifecycle, and retirement decisions remain evidence-bearing and reversible.

EVIDENCE - BOUND TRANSITION FLOW

No novelty claim becomes an operational claim without reproduced evidence and an explicit authority decision

INTERPRETATION AND ASSURANCE

How to apply this publication

Normative intent

Requirements define outcomes and constraints. Implementations may vary, but evidence must demonstrate equivalent control.

Evidence over assertion

Vendor documentation and design intent are not equivalent to reproduced behavior. Record evidence grade and uncertainty.

Risk-proportional depth

Higher consequence, autonomy, sensitivity, and irreversibility require stronger isolation, review, verification, and recovery.

Controlled exception

Exceptions require an owner, rationale, compensating control, residual-risk acceptance, expiration, and reevaluation trigger.

Normalized assessment scale

A numeric score must never hide a failed mandatory gate, missing evidence, untested workload, or unacceptable residual risk.

MYTHOS-GUIDE-EMT-0001 / EMERGING TECHNOLOGY

Engineering Doctrine

Engineering guide for horizon scanning, evidence classification, experiments, pilots, transition gates, and retirement.

OPERATING POSITION

Classify evidence before discussing adoption.

- Always compare against an incumbent or classical baseline.
- Treat transition as a controlled change program, not a technology demonstration.

MYTHOS-GUIDE-EMT-0001 / EMERGING TECHNOLOGY

Research Lifecycle

OPERATING POSITION

Question and value thesis.

- Source and evidence-state review.
- Reproducible experiment.
- Security, safety, and failure challenge.
- Bounded pilot.
- Adopt, reject, defer, or sunset.

MYTHOS-GUIDE-EMT-0001 / EMERGING TECHNOLOGY

Experiment Package

OPERATING POSITION

Versions, hardware, software, protocol, model, data, calibration, environment, sample, metrics, uncertainty, cost, and acceptance criteria.

MYTHOS-GUIDE-EMT-0001 / EMERGING TECHNOLOGY

Transition Gate

OPERATING POSITION

Named sponsor and risk owner.

- Representative evidence.
- Operational support and skills.
- Rollback and supplier exit.
- No failed safety, security, reproducibility, or legal gate.

MYTHOS-GUIDE-EMT-0001 / EMERGING TECHNOLOGY

Evidence Operations

OPERATING POSITION

Preserve negative results, rejected alternatives, uncertainty, source currency, incidents, and revalidation triggers.

MYTHOS-GUIDE-EMT-0001 / EMERGING TECHNOLOGY

Publication Controls and Decision Record

Permanent identity, evidence, exceptions, and revision discipline

- Document identity remains stable across revision and packaging.
- Evidence grades and uncertainty accompany consequential claims.
- Exceptions are time-bounded and independently visible.
- Source currency is reviewed at assessment and scheduled publication review.
- Release artifacts are hashed and listed in the public manifest.

11. Source Authority and Reference Register

Primary sources informing interpretation; verify current status at assessment time

NIST CSF 2.0

Cybersecurity Framework 2.0

<https://doi.org/10.6028/NIST.CSWP.29>

Enterprise governance and cybersecurity outcome framework.

NIST Integrated Photonics

Integrated Photonics Program and Metrology

<https://www.nist.gov/programs-projects/integrated-photonics>

Primary research and measurement work for heterogeneous integrated photonic devices.

NIST SP 800-53 Rev. 5

Security and Privacy Controls for Information Systems and Organizations

<https://doi.org/10.6028/NIST.SP.800-53r5>

Broad organizational control baseline for technology systems and services.

ITU-R M.2160

Framework and Overall Objectives for IMT-2030

<https://www.itu.int/rec/R-REC-M.2160-0-202311-I/en>

In-force framework for IMT-2030 objectives, use cases, and capabilities.

NIST PQC Project

Post-Quantum Cryptography Standardization and Migration

<https://csrc.nist.gov/projects/post-quantum-cryptography>

Final PQC standards, continuing algorithm work, migration direction, and official project status.

ETSI ISG PDL

Permissioned Distributed Ledger Specifications

<https://www.etsi.org/committee/pdl>

Primary technical work for governed distributed-ledger systems and decentralized trust.

IEEE P3706

Guide for Brain-Inspired Computing Technologies

<https://standards.ieee.org/ieee/3706/12098/>

Published guide describing brain-inspired computing technology options and terminology.

3GPP Release 20

5G-Advanced Studies and 6G Study Roadmap

<https://www.3gpp.org/specifications-technologies/releases/release-20>

Official release program separating continued 5G-Advanced work from initial 6G studies.

Source currency rule: authorities, specifications, laws, provider services, hardware, protocols, standards status, and research evidence MUST be checked at assessment time. This publication records a 2026-07-24 source snapshot.
